AECC
CHIROPRACTIC CLINICS

A close-up photograph of a woman with light-colored hair kissing a newborn baby on the forehead. The woman's face is in profile, and the baby's face is in profile, looking towards the woman. The background is a soft, out-of-focus grey.

Combined Chiropractic and Midwifery Newborn Clinic

Breastfeeding your baby can be regarded as the most natural thing in the world, but it can also be a stressful time. Problems such as poor positioning and attachment at the breast, frequent regurgitation and birth related difficulties can make the feeding extremely challenging – yet help is at hand.

Here at the Combined Chiropractic and Midwifery Newborn Clinic, a specialist centre for you and your baby, chiropractors and midwives have pooled their knowledge and experience with the goal of providing more effective ways to help mothers and babies establish successful breastfeeding.

Our dedicated clinic can help with the following:

- Mouth-opening difficulties
- Poor positioning and attachment at the breast
- Pulling back when feeding
- Suck too strong or too weak
- Poor weight gain or weight loss
- Frequent regurgitation and gagging
- Sore/cracked nipples
- Usual positions unworkable
- Deviated jaw.
